

NOV 21 2005

REMARKS

The Official Action mailed September 20, 2005 noted that the specification did not appear to disclose the "projection being cleaned by water passing through said outlet aperture in use when said body is located in said water stream", as recited in claims 43 and 44. The Examiner noted that the specification does disclose, on page 4, lines 10-12, "such projection is useful where the user has particularly dirty hands since the projection is cleaned by passing water during use."

Inasmuch as the drawing was held not to show the feature referred to above, the drawings were objected to under 37 C.F.R. 1.83(a) and corrected drawing sheets were required.

The Present Amendment

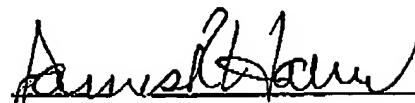

The present Amendment deletes "passing through said outlet aperture" from claims 43 and 44 (and hence from dependent claims 45 and 46). Inasmuch as claims 43 and 44 no longer call for projections to be cleaned by water "passing through the outlet aperture", the claims are supported by the specification and by the drawing, and we respectfully submit that no new drawing, accordingly, is required.

This Amendment responds to all of the objections raised by the Examiner in the most recent Official Action, and renders the claims immediately allowable. Entry of this Amendment under the provisions of 37 C.F.R. 1.116 is hence believed to be in order and is courteously requested. A Notice of Allowance is solicited. If the Examiner finds that other matters are outstanding that could be dealt with by an Examiner's Amendment, a phone call to the

undersigned would be appreciated.

Respectfully submitted,

Dated: Nov. 21, 2005
